Welcome to

SPAREON INDIA

Spareon India is the authorized channel partner of Taiwan-based Spareon Taiwan, a renowned manufacturer of high-quality spare parts for advanced rice milling machinery. All Spareon products are engineered and manufactured in Taiwan using modern technology, precision engineering, and stringent quality control systems to ensure consistent performance, durability, and long service life.

With a strong commitment to quality and customer satisfaction, Spareon India specializes in supplying premium spare parts for leading rice milling machines such as Buhler and Satake, which are widely used by modern rice mills across India. Our products are designed to meet the demanding requirements of high-capacity milling operations, ensuring reliable performance and reduced maintenance costs.

By maintaining ready stock availability in India, we ensure timely delivery and uninterrupted supply to our customers, helping rice millers maintain smooth and efficient operations. Our team understands the critical role of reliable spare parts in achieving consistent production and superior output quality.

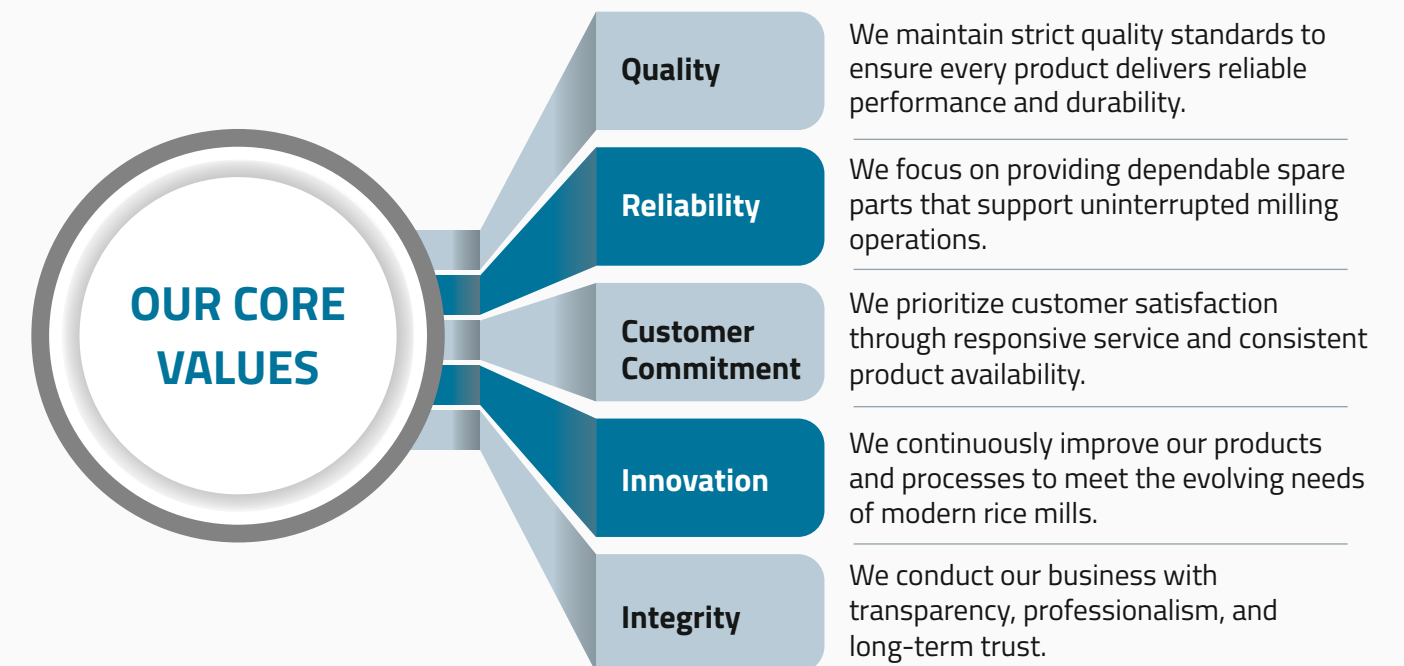

Guided by our core philosophy "Strong Parts for Stronger Machinery," Spareon India is dedicated to supporting rice millers with dependable solutions that enhance machine efficiency, improve productivity, and ensure long-term operational success.

WHY CHOOSE SPAREON INDIA?

- Authorized Channel Partner of Taiwan-based manufacturer
- Premium quality spare parts manufactured using advanced technology
- Specialized in spare parts for Buhler and Satake rice milling machines
- Ready stock availability in India for faster delivery
- Reliable performance for modern high-capacity rice mills
- Strong focus on quality, durability, and precision
- Competitive pricing with consistent product standards
- Professional service and dependable customer support
- Trusted partner for rice millers across India

COMPANY VISION

To become a leading and trusted supplier of high-performance spare parts in the rice milling industry by delivering superior quality products, reliable service, and innovative solutions that contribute to the growth and efficiency of modern rice processing businesses.

We aspire to build long-term partnerships with rice millers by consistently providing dependable products, maintaining the highest standards of quality, and supporting the industry with professional service and technical expertise.

OUR STRENGTH

- International-quality products manufactured in Taiwan
- Strong supply chain and stocking network in India
- Deep understanding of rice milling machinery requirements
- High durability and long-lasting spare parts
- Consistent product performance and reliability
- Dedicated support for professional rice millers
- Focused expertise in Buhler and Satake machinery
- Commitment to long-term customer relationships

PRODUCT APPLICATION

Spareon India provides high-quality spare parts suitable for the following rice milling machines:

- Husker Machines
- Whitener Machines
- Silky / Polisher Machines
- Paddy Separator Machines
- De-Stoner Machines
- Sizer Machines

All types of SATAKE WHITENER SR SCREW FEEDER & SR UPPER CYLINDER

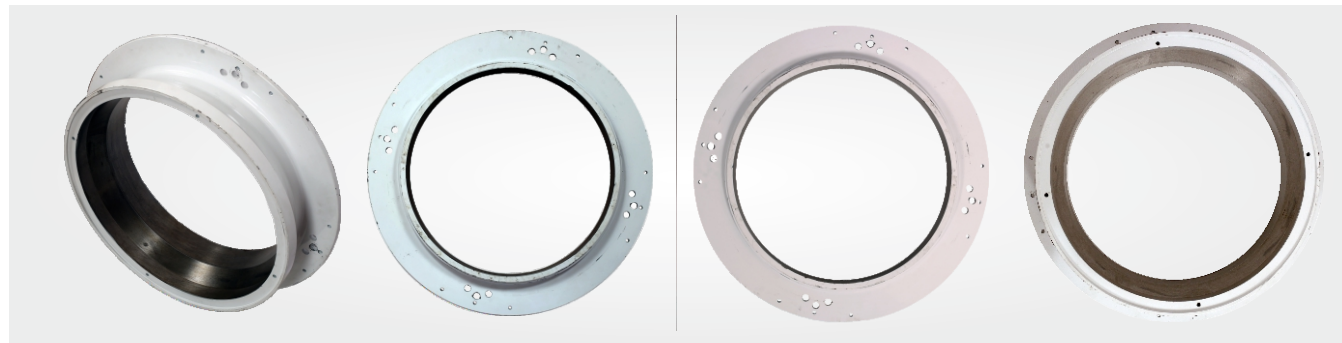

We are a noteworthy organization, occupied in providing pristine quality range of SR Screw Feeder & SR Upper Cylinder. The offered screw is manufactured using supreme grade metal with the help of ultra-modern techniques in compliance with set industry norms. Moreover, it is checked for its quality on series of quality parameters before being supplied to our clients. We offer this screw to our clients in different sizes as per their necessities.

SATAKE WHITENER

VTA-3, VTA-5, VTA-7 SR, VTA-9, VTA-10, VTA-12, VTA-12 SR, 15 GMT, 16 SR SCREW FEEDER

SATAKE SILKY

KB-40, 60, 75, 80, 100 SCREW ROLLER

Features:

- Made from high-quality stainless steel material for durability and longevity.
- Precisely engineered and machined to ensure consistent and accurate milling results.
- Resistant to corrosion, rust, and wear, ensuring a long service life.
- Smooth and polished surface finish for efficient milling operations.
- High precision and dimensional accuracy for consistent and uniform product quality.
- Can be easily installed and integrated into milling machines or systems.
- Easy to clean and maintain, ensuring hygienic and contamination-free milling processes.
- Available in different sizes and configurations to meet specific milling requirements.
- Designed to withstand heavy-duty milling operations and maintain performance under demanding conditions.
